DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a system with at least one server for accessing data item in at least one data source, one client, one data channel for providing an interface between server and client, and one client tool for displaying the data items from the data source, classified in class 709, subclass 219.
 - II. Claims 10-19, drawn to a method for accessing data items within at least one data source by creating a document with at least one conference associated therein for representing data items, and control accessing via an instance, classified in class 707, subclass 2.
 - III. Claims 20-26, drawn to a system for communication between users with means for creating information from a user terminal, distributing the information to other user terminals, and modifying information in a selected format at other user terminals, classified in class 707, subclass 10.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, Group I is drawn to a system with at least one server for accessing data item in at least one data source, one client, one data channel for providing an interface between server and client, and one client tool for displaying the data items from the data source, Group II is a method for accessing data items within at least one data source by creating a document with at least one conference associated therein for representing data items, and control accessing via an instance, Group III is drawn to a system for communication between users with means for creating information from a user terminal, distributing the information to other user terminals, and modifying information in a selected format at other user terminals. See MPEP 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicants are advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicants is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CR 1.48(b) and by the fee required under 37 CFR 1.17(i).
